**Kirbi Pemberton • Pattonville Senior High School**

It's time to clean up West Lake a Landfill. I've buried one child at the age of 12. I have three other sick children. This radioactive waste with a smoldering fire sits next to residents, stores and 1.6 miles away from a High School and 1.8 miles from an elementary school. 40 years is to long!!! EPA turn this to people who know how to handle this clean up. St. Louis FUSRAP!!

Westlake Landfill needs to be turned over to FUSRAP and The Army Corps of Engineers. We don't want this same radioactive nuclear waste in our backyards!

**Byron Clemens • Top Commenter • Works at AFT - American Federation of Teachers**

A step in the right direction. Time to clean up ALL of the WW II era atomic waste from Manhattan project in St. Louis area INCLUDING WEST LAKE LANDFILL in Bridgeton. People have suffered enough from exposure to these atomic weapons' wastes.

Dawn Chapman

It's time to end this legacy of heartache throughout St. Louis! Right now we have this same radioactive waste sitting up at West Lake Landfill on the surface just hundreds of feet from an advancing fire....this is what happens when this waste is allowed to sit out in communities and next to our schools. Join West Lake Landfill to help us!
